TECHNICAL SKILLS

Experienced

Tiny to zero learning curve, However not mastered

JAVA   JAVASCRIPT
MYSQL   NODE JS
CSS/SASS   REACT JS
REST APIS   REDUX JS
GIT   REACT ROUTER
AGILE   EXPRESS JS

Proficient

Small learning curve, It's been awhile

PYTHON   PHP
DJANGO   ANGULAR JS
ELASTIC   BOOTSTRAP

Familiar

Medium learning curve Have played with

JENKINS   SWIFT 3
FIREBASE   SPRING MVC
ANDRIOD   MONGODB

To Whom It Concerns,

Interested in Application Development and Machine Learning/ Artificial Intelligence, I am looking for a full-time Software Engineering position after May 2018.

Currently a senior at Iowa State University majoring in Software Engineering with a minor in Leadership Studies, I will complete my degree in May 2018.

For a year, I worked as a full-stack Web Developer developing with PHP, MySQL, JavaScript, and Bootstrap CSS.

I then interned at IBM on their software tooling team improving Continuous Integration/Continuous Development operations. The following summer, I interned at GoDaddy on their Reseller Team creating, restructuring, and extending Node.JS, Express.js, React.JS applications.

Eventually, I want to attend graduate school for a Master's in Machine Learning/ Artificial Intelligence and/or Public Policy.

I have a passion for poverty and global education. Long term, I want to create software for government entities and public policy.

I'd love the opportunity to communicate further about full-time opportunities. Please let me know if you have any questions. I can be reached at (402)-578-3545 or at lilannie@iastate.edu.

Thank you for your consideration.

Sincerely

Annie Steenson
